

For Immediate Release:

**Military and Aerospace Counterfeit Part Verification by Century Fasteners Corp.**

*Counterfeit Avoidance, Detection, Mitigation and Disposition - Aerospace AS5553 & AS6081 Standards*

**Century Fasteners Corp** is committed to preventing the receipt of counterfeit material and has a history of customer compliance through comprehensive quality assurance processes.

As part of this commitment, we follow strict quality requirements per the Aerospace AS5553 & AS6081 Standards and utilize a checklist to monitor the process.

- Parts must be from the original equipment manufacturer or a franchised distributor.
- Parts must be in the original manufacturer's packaging with lot traceability to the certification supplied with the material.
- If parts have sealed packaging they are not removed for detailed part inspection.
- If parts are not in sealed packaging a visual inspection is performed using 3X magnification to check for any relabeling or part alterations.

In addition, Century Fasteners has implemented a training and awareness program to insure compliance.

Since 1955, Century Fasteners Corp. has been a Master stocking distributor of fastener and non-fastener products for the military, aerospace and commercial industries. We are **AS9120 REV.A** and **ISO9001:2008** certified and are pleased to represent a broad spectrum of the world's most prominent quality manufacturers.

Century Fasteners, headquartered in New York, currently has 15 branch stocking locations throughout the United States, Mexico, Puerto Rico and Canada.

In addition to supplying our customers with quality products, we seek to streamline the entire supply chain. We utilize a wide range of value-added services and the latest technologies that can significantly lower your cost of ordering, stocking and maintaining inventory.
