Hydrostatic or Proof Pressure Test

A Certification of Conformance to the applicable hydrostatic or proof pressure test requirement is required with shipment. Material received without certification is subject to rejection and return to the supplier at the supplier's expense. The certification shall include, as a minimum, the following information, as applicable:

- Purchase order number, part number, revision, and serial or lot number(s) of the part(s) covered by the certification
- Test fluid
- Actual pressure and time at pressure
- Volumetric expansion vs. pressure
- Pressure at rupture, if applicable
- Number of tests performed on each part
- Dimensional inspection before and after test. Note: Dimensions to be inspected to demonstrate that there has been no permanent deformation due to hydro test will be attached, if applicable.
- Signature of the Quality Assurance Manager or other responsible member of the supplier's company (a typed name with title on a computer generated document is an acceptable substitute for signature).
- The title of the person signing.

If the required information is incorporated into an CF/NGC-approved test plan, the certification may reference the test plan in lieu of reporting the information above.
