Packaging and Marking for Shipment (Dunnage)

Proper cushioning or wrap must be used to prohibit damage from shock or vibration, and abrasions from contact with other surfaces. Cushioning or wrap can be any suitable, appropriate material, excluding newspapers when painted surfaces are involved. Dunnage must be used in cases where movement or agitation of item(s) would cause damage to item(s). Partitions or divisions must be used when necessary to protect items as such. When pallets are utilized for shipment they should be a maximum of 42" wide by a maximum of 48" deep with a maximum loaded weight of 2000 lbs. and a maximum loaded height of 48" from floor level.
